- Management of new buildings and conversions of ships
- Crewing – services and training
- Chartering
- Insurance of ships

We are looking for a

QHSE Manager (male/female/diverse)

for our QHSE management at our headquarters in Buxtehude in the near term for the following demanding field of activities:

- Development, implementation, update, auditing and regular review of the QHSE management systems
- Targeted further development of the QHSE areas energy management, environmental protection, health protection and safety at work on shore and at sea
- Planning and conduct of internal and external audits/certifications
- Safeguarding and update of the quality assurance processes of the company
- Processing of flag state requirements
- Creation and update of risk analyses as well as development and implementation of strategic guidelines in the areas health, safety and environment
- Advice and support of the management
- Development of prevention measures based on the knowledge gained
- Analysis and future-oriented further development of relevant KPIs

You show a lot of personal initiative and motivation, and furthermore you have:

- A degree in engineering or a completed education as a technician
- Practical experience in internal auditing of quality management systems, e. g. from the maritime shipping, aviation, the oil and gas industry or similar
- Certification as an internal auditor in accordance with the industry-specific ISO standards
- Experience in the application and further development of integrated management systems
- Solid knowledge of the applicable regulations, guidelines and laws in connection with the education as an occupational safety specialist
- A very good knowledge of spoken and written English
- An unlimited willingness to travel
- A high degree of intercultural understanding

If you are interested, please send your sound application indicating your earliest possible start date and your salary expectation to:
